**AVIAN FLU UPDATE
AND WHY FSBS PLUS NOW**

by Machaelle Wright
Perelandra, Center for Nature Research

THE PANDEMIC HAS NOT STARTED. RELAX. BREATHE. JUST READ ON: No one knows if a pandemic could start in two weeks or two years. But most experts agree that a global outbreak will eventually hit and that now is the time to get ready.

That leads me to FSBS Plus. You now have your bottle(s) of FSBS Plus. Previously I wrote that we would not be able to produce FSBS Plus until H5N1 mutates to the point where it can easily jump human to human. For months, I regularly checked with nature about when it was time to make the FSBS Plus tincture. To my surprise, I got the go-ahead in mid-August. *But I want to make it absolutely clear that this does not mean a pandemic is happening now.*

Here's how it was explained to me: H5N1 has now mutated to the point where nature can identify its pandemic patterns. Nature uses this as the foundation for creating the FSBS Plus tincture. As far as nature is concerned, it is advantageous for us to begin taking FSBS Plus now, before a pandemic begins. This gives our bodies and our microbes what they need to set up properly and prepare for exposure to H5N1.

I've debated with myself about making this next information public because it borders on the weird ☐ for some people and I don't want it to make you uncomfortable about using FSBS Plus. But I've decided to go public because I think having the information can give you more confidence about using FSBS Plus throughout the full pandemic. And it also explains why we can release FSBS Plus ahead of the crisis.

The FSBS Plus you have in your bottle(s) contains the pandemic foundation pattern from H5N1 and it represents the current state of the virus, including its different strains. I am checking that pattern with nature on a regular basis to see if it needs to be modified or upgraded in order to reflect a new level of H5N1 activity and mutation, or new strains. If so, I will adjust the pattern with nature on the devic level. When this is done, the FSBS Plus pattern in your bottle(s) will *automatically and instantaneously* reflect that adjustment. There will be no waiting period for the adjustment to be contained in the solution in your bottle(s). This is because the physical aspect of form can *only* reflect its devic pattern. The old FSBS Plus solution can no longer exist if its devic pattern has been adjusted. The solution must be a full and faithful reflection of the newly modified devic pattern. I will be working with nature to keep the FSBS Plus pattern current throughout the entire period that H5N1 remains a human threat or issue. By working with FSBS Plus in this manner, nature is able to provide us with direct assistance that never becomes outdated. As this virus shifts, so too will FSBS Plus. You need do nothing with your

bottle(s). Just know that the upgrades will occur automatically, and you can continue taking your daily doses with confidence.

If none of this makes sense to you, ignore it. You don't have to understand the nuts and bolts of FSBS Plus for it to work effectively for you. All you need to know is that FSBS Plus specifically addresses the body's exposure to H5N1 avian flu. (However, it does not address the annual seasonal flu viruses. We have a separate solution for seasonal flu.)

DOSAGE: As soon as you receive your FSBS Plus, begin taking 10 drops twice daily, first thing in the morning and at bedtime. The dosage is the same for all people of all ages, including children and babies. The dosage is also the same (10 drops) for animals. Continue this schedule until it is clear that H5N1 is no longer an issue worldwide. Should a pandemic break out, we could be talking about a period of two years. In case of illness, continue the twice-daily schedule throughout the illness.

NOTE: FSBS Plus prepares the body for exposure to H5N1. Among other things, it modifies the landscape of your body's microbial population in order to set up natural defenses. For some people, this could include a minor flare-up of an old microbial issue (such as athlete's foot, etc.). This is FSBS Plus adjusting that situation and causing the remnants of the old microbial problem to release from the body. For mild flare-ups, continue taking FSBS Plus twice daily and let the body naturally complete the cycle of moving through the problem and striking a new microbial balance in your body. For stronger reactions, treat the situation as you would normally — and continue taking FSBS Plus twice daily.
